

Big and Small

Let's sing!

There are things that are really big
and others that are small
Sometimes things start off quite short
and then grow very tall!

**Can you show something
that is big or small?**

Fun Fact.

A Gum tree starts out as a tiny seed before it slowly grows into a giant tree that can be a 35 metres tall!

Practise carefully **Cutting along the Lines.**

Activity Suggestions! Let's have some BIG and small fun!

- # Stringing beads of different sizes
- # Three bears counters
- # Various ball sizes and through in small and big baskets
- # Plant a quick growing seed and watch it grow

- # Have children bring in a picture of when they were small- take a current picture and talk about the difference and what's the same of when they were big and small
- # Match animal babies and mums (small babies and big mums/dads)

- # Fill balloons with water and freeze small and big ones.
- # Pegs and peg boards
